SUMMARY

Final-semester CSE student and Android developer who builds complete apps with Java, Kotlin and Firebase, and adds AI features such as OCR, image labeling and semantic similarity. My final year project, LostAndFound, placed 2nd at the project defense at ADUST. Previous customer-facing sales roles gave me strong communication and teamwork skills.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart, Python, JavaScript
Android: Android SDK, Jetpack Compose, XML Layouts, Material Design
Cross-platform & Web: Flutter, React, HTML, CSS
Backend & Cloud: Firebase (Authentication, Realtime Database), FastAPI, Hugging Face Spaces
AI / ML: TensorFlow Lite, ML Kit (OCR, Image Labeling), Gemini Vision API
Tools: Git, GitHub, Android Studio

PROJECTS

LostAndFound: Smart Item Recovery Platform (Final Year Project, 2nd place at defense) *Java, Firebase, ML Kit, JavaScript*

- Built an Android app and a companion website that share one Firebase Realtime Database backend.
- Used ML Kit OCR and image labeling to describe items automatically, plus Hugging Face semantic similarity to flag fraudulent claims.
- Added real-time chat, map views, multi-photo upload and an admin panel with analytics.

CGPA Calculator *Kotlin, Jetpack Compose, Firebase*

- Semester-wise course management with CSV, PDF and OCR import, and PDF transcript export.
- CGPA trend charts, biometric lock and instant English/Bangla language switching.
